

# Utah mDL

Mobile Driver License

# Where it began

## Legislation - 2019 SB 100

- RFI 2019
- RFP 2020
- Pilot 2021
- Production 2022

# What is an mDL

- 1. An mDL is a digital representation of your driver license or ID card.**
- 2. It is an extension of your physical credential.**
- 3. It is an encrypted data package that lives on your phone or mobile device.**
- 4. It is an electronically verifiable identification.**
- 5. It puts the control of data sharing in the hands of the credential holder.**

# What is not an mDL

mDL is **NOT** a picture of the physical DL/ID on the device

mDL is **NOT** scanning a PDF417 barcode

mDL holder should never **SHOW** credential info

Relying Party should never **TAKE** the holder's device

# How it works

mDL

mDL reader

# Why Use an mDL?

**Confirm Identity**

**Convey Driving Privileges**

**Trustable**

**Interoperable**

**Selective Info Release**

**Data Minimization**

**Remote Management**

**Work Offline**

**Privacy and Security By Design**

# Is an mDL better than a physical credential?

**BETTER THAN THE PHYSICAL**

**MAINTAIN  
TRUST**

**MORE  
ASSURANCE**

**TIMELINESS**

# Trust and Assurance

## Trust

Accept physical credentials from Issuing Authorities

## Standards

Issuing Authorities build credentials based on standards

## Matching

Photo is used to match the person to the credential presented

## Authentication

Advanced security features are used to determine authenticity
